A LAMP FOR A LIFETIME

www.utub.tatlab.coop

ECO-DESIGNED
IN BARCELONA
HANDMADE

Branca is a handmade lamp in which contemporary design, energetic sustainability and uniqueness of the materials used coexist. The electronic components and LED technology incorporated into the design achieve a high level of eco-efficiency, providing a light source which consumes less than 1 watt of electricity and has an average life span up to five times longer than that of similar lamps. The forms of nature provide the inspiration for this point of minimalist light, designed to function equally well as a desktop, nightstand or ambient light.

TECHINICAL NOTES

YEAR	2015
